

# AISF Training Course Update

## INTRODUCTORY POWDERCOATING APPLICATION

A foundation powdercoating course, this introductory training program is designed for powder coaters with little or no previous powder coating experience (< 3 years).

The course is as an intensive two day course, conducted onsite at a powder coating facility, which allows for hands on practical training.

Course structure focuses on many aspects of powder coating including powder coating materials, application of powder coatings, reclamation of powder coatings, testing and evaluation, quality control, the manufacturing process of powder coatings

This course is suitable for those

- Looking for ways to improve your understanding of the powder coating operation
- Looking to better understand how to select the correct powder coating for your application
- Interested in learning more about powder coating testing and evaluation

## BASIC ELECTROPLATING TRAINING COURSE (2 days)

The 12 week Basic Electroplating course is now available for you in a two-day training program. This practical, two-day training program is designed to give you a better understanding of the basic principles and practices of electroplating.

Our course is great for;

- Plating technicians/ Operators, Project managers and Engineers requiring a better understanding of plating operations
- Technical/Sales Representatives who sell into the electroplating industry

Topics covered include: principles of electroplating, electrodeposition of nickel, electroless nickel plating, decorative and hard chrome, copper, silver and gold plating, zinc plating, chromate passivation, treatment of aluminium alloys, waste treatment, effluent treatment, and safety aspects

## POWDER COATING FOR WINDOWS

QUALICOAT Australia has developed a brand new one day training course for all AWA Members. Participants will learn how to specify fit for purpose powder coating of their products to ensure compliance with relevant standards and accreditation protocols.

This course is fully endorsed by the AWA, AISF and Qualicoat. For more information or to register visit the website [www.afti.edu.au/Powder-Coating](http://www.afti.edu.au/Powder-Coating) or contact the AWA.
